

Statement

I am -----, mine foreman for the MMU 001 section of the Cut 'em deep coal company. For the purposes of this contest, you are the certified examiner and MET for the third shift. MMU 001 utilizes 1 continuous miner, 1 roof bolter and 2 battery ramcars to produce coal on 2 shifts a day, with the midnight shift used for maintenance. You are to conduct a pre-shift examination of the MMU 001 section and beltline. As soon as you complete your examination, come back outside and fill your books out so that the day shift crew may go in to run coal. We also need you to stay over because we do not have any other MET's for the day shift coal crew. You will receive a copy of this statement, a blank map and the roof control and ventilation plans before you go in. You will have 5 minutes to study these before you must start the clock. Good luck!
