

Carlsbad Number One Judge Instructions:

When the team runs dry material down the shaft to check for heat or water, you will indicate to them;

The hoistman just reported slack rope on the hoist. When he tried to raise the skip it hung up. It is located between the 200 and 300 foot level.

When the team makes their way to the refuge chamber they will not be able to get to the door because of water over knee deep. They can however knock on the wall of the refuge chamber and give the team this information,

There are 5 of us in here. We are all in good health. We have clean water, clean air and solid ground behind us. The water is rising in here so please get us out. That's all I know.
