

Mine Manager Statement

Captain, when you are ready I would like to give you the most updated information that I have received.

- We have still not been able to establish contact with the miners on the 1800' level.
- We located two miners that were assigned to the 1800' level crew, they were on surface at the warehouse and just forgot to tag out of the mine.
- The guards posted at the #3 shaft said that the fan has quit working and we do not know what the issue is at this moment.

I will provide you with additional information as I receive it.
